

## Lite-On Technology Corp. Reports October Sales of NT\$ 10.15 Billion

2011/11/08

Lite-On Technology Corp. (TW 2301) today reported October consolidated revenue of NT\$10.15 billion, maintaining the same level as the prior month, mainly attributable to stable end-demand in the smart-phone and server markets. Cumulative sales from January through October totaled NT\$99.96 billion.

Thanks to solid orders received by Lite-On's core business units in October, the Power Supply business group showed continuous growth over the past 4 months, and the Opto-Electronics business group posted a 4% increase in revenue over last year. Included in the latter category, the Camera Module business unit capped 4 consecutive months of new record monthly highs, resulting from ongoing market share gains and increased shipments of PCs and smart-phones globally. In the Mechanical Competence business group, the HIS (Human Input Solutions – PC keyboards and peripherals) business unit continued its ongoing market share gain, posting sales growth of approximately 20% Y-o-Y.
