

Spread LITE-ON Power and Influence to the Industry

Outside the company, LITE-ON is an active supporter of business associations and trade organizations and promotes the adoption of international standards in the industry. Through the Taiwan Optoelectronic Semiconductor Industry Association (TOSIA), of which Rex Chuang, president of Lite-On Optoelectronics Product Solution Group, used to be the chairman, we not only lobby for policies relevant to the industry, but also play an active role in establishing standards and guidelines. The "Smart Optoelectronic Semiconductor Sensor" and "LED Lighting Southbound Chain" task forces were created to promote participation in trade conferences and introduce a global perspective into the industry. Collaboration with outside parties has shown significantly improved results.

As one of the founders of the Taiwan IoT Technology and Industry Association, LITE-ON brings together the knowledge and the technology in Taiwan's electronics industry to create industry know-how communities. Members include representatives of the Taiwan Semiconductor Industry Association, Sinocon Foundation, Taipei Computer Association, Taiwan Electrical and Electronic Manufacturers' Association, LITE-ON Group, Inventec Group, Delta Electronics, Kinpo Electronics, MiTAC Information Technology, Syscom Group, ASUS Cloud, and Etron Technology. These representatives of the industry join the associations to share professional skills and work together to improve Taiwan's core competencies in IoT related emerging industries.

Regarding the government, we took advantage of our role as a member of the Taiwan Telematics Industry Association and assisted the government in accelerating the implementation of regulations and standards regarding V2X, fleet tracking and management, and ADAS/DMS for commercial vehicles. Data exchange standards, privacy protection and data security, and network security standards were implemented in order to stay aligned with worldwide trends. We have taken further steps in working more closely with organizations in China, Northeast Asia, and Southeast Asia to match local businesses and explore international opportunities. Regarding environmental sustainability, Lite-On plays a key role in the Global e-Sustainability Initiative (GeSI) as a member of the board. We follow climate change issues closely with international leading companies. We also continue to put forward aggressive strategies of supply chain management and corporate social responsibility.

To continue to strengthen stakeholder engagement, LITE-ON started compiling data on its sponsorships for associations and organizations this year. Information regarding the associations and organizations of which we are a member are shown in the table below.

Expense of Participating Public Association

Public Association	Expense (NTD)			
	2015	2016	2017	2018
The Business Council for Sustainable Development of Taiwan	\$60,000	\$60,000	\$60,000	\$60,000
Taiwan Corporate Governance Association	\$15,000	\$15,000	\$15,000	\$15,000
The Institute of Internal Auditors-Chinese	\$0	\$0	\$12,000	\$12,000
Photonics Industry and Technology Development Association	\$36,720	\$64,100	\$0	\$0
Taipei Computer Association	\$15,000	\$15,000	\$15,000	\$15,000
Taiwan Electrical and Electronic Manufacturers' Association	\$42,000	\$42,000	\$142,000	\$42,000
Taipei Electronic Components Suppliers' Association	\$15,000	\$15,000	\$15,000	\$15,000
Taiwan Optoelectronic Semiconductor Industry Association, TOSIA	\$300,000	\$300,000	\$300,000	\$300,000
The International Commission on Illumination-Taiwan	\$30,000	\$30,000	\$30,000	\$30,000
Taiwan Lighting Fixture Export Association	\$6,000	\$6,000	\$12,000	\$12,000
Taiwan IoT Technology and Industry Association	\$0	\$30,000	\$30,000	\$30,000
Asia IoT Alliance (AIOTA)	\$0	\$60,000	\$60,000	\$60,000
Taiwan Telematics Industry Association	0	\$0	\$80,000	\$50,000
Taiwan information Storage Association	\$10,000	\$10,000	\$10,000	\$10,000
Total	\$531,735	\$649,116	\$783,017	\$653,018
